5	I would really like to participate in an advanced course/next level course and would suggest to give the option direclty at registration for the introduction course. It would be great to directly follow up.
8	Extending the duration of the workshop would be good and beneficial.
9	I think the workshop could be more occasions, including home works to practice right after the lecture what we have learnt that day.
10	more time (a longer course), to cover more topics

5	It was a great introduction to R with a lot of help and support. I strongly recommend this course to everybody who wants to start data analysis and data visualisation with R. I would love to participate in an advanced course.
8	It would be nice if a follow up workshop with the trainer is provided to further expand our knowledge and training in using R

Frage 7: Folgende Rahmenbedingungen der Veranstaltung (z.B. Format, Dauer, Inhalte) würde ich wie folgt verändern ("/" für keine Angabe):

Antwort

/

It was a really great course and the trainer was very clear and patient. Would like to take another R/stats course from the same trainer that is more advanced in the future.

Not make it start at 8:30 :(and make it all one week - I don't mind the intensity, I would prefer to plan to only focus on the course content without trying to juggle experiments to fill up the remaining half of my week. Also would have preferred more focus on learning code/functions, and not so many lessons on p-values and null hypotheses.

The duration was perfect with enough breaks in between and covered all the topics as advertised in the course information. I have no prior knowledge with coding and Paul understood that and managed to provide as much details as possible which I very much appreciate

i think it was very well set up

I learnt a lot in this workshop and I would like to continue learning about R studio because the workhop was very helpful and easy to understand.

I would like a part 2 of the course!

It was a really good workshop, I could use R right away after the first courses and it was super efficient and useful. The pace was right, you answered all our questions and we were still on time to tick all the skill boxes. The website you created is actually a golden resource that I will keep and read in-depth later when I need some more tips. And most likely I will share it. Thank you for making this workshop.

Would love to take another course from Paul Schmidt! He was great, and made a zoom course VERY effective, which is wildly impressive to me. He is very good at what he does.
