

## Evaluation of the workshop “Statistics with R - an Introduction”

Lecturer: Dr Paul Schmidt

Attendance: 12 (10 filled out the evaluation)

Date: December 5 and 6, 2023

*The total may deviate from 100% due to rounding.*

### What did you especially like?

- The content was well explained and nice tips were included too.
- The clear structure and extra information and practice tips
- Easy to follow along, lecturer responded well to questions, good tips to simplify working with R
- I like the teacher and the lesson style. It was truly excellent, and I would like to enroll in the next session for more insights and to learn more statistical models
- the teacher, speaks clear and easy to understand. I liked that there was only practical part!
- Paul is a great instructor and I enjoyed the way the workshop was structured. It was very well-paced and he ensured that everyone had understood each concept before he moved on to new chapters. I personally was very rusty on my statistics knowledge going in but feel that I learned a lot and will use the new skills I acquired in my research going forward. The online format was also very convenient and there were enough breaks to ensure that everyone was focused and engaged throughout the workshop. All in all a 10/10 experience.
- Learning the basics and stepwise elaboration of basic concepts from installing R to performing basic functions. in addition there were guided examples and exercises after every concept.

### What do you think could be improved?

- Maybe less basic code

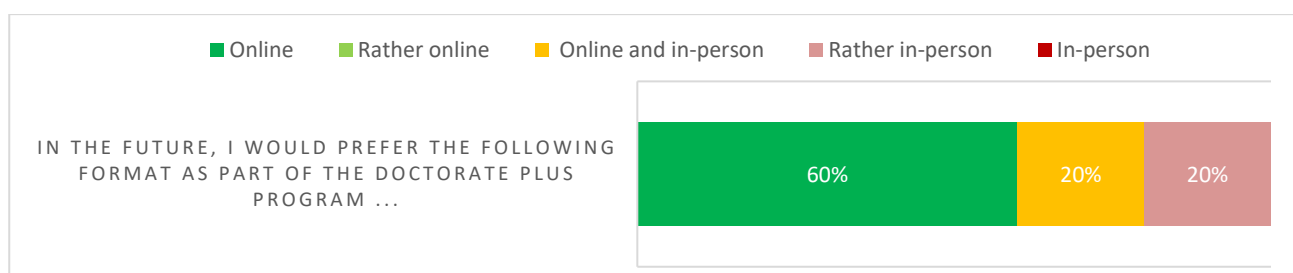

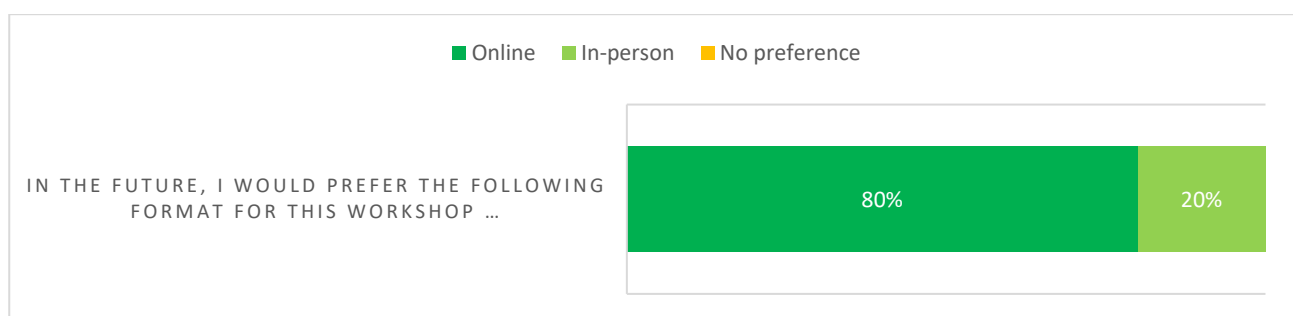

- increase the hours, during different weeks in a month, not all in 1 week. To have time to process all the infos
- Nothing! Paul did a great job of taking everyone's current skill level and interests/needs into account before, during, and after the workshop. He is clearly invested in the material and cares about delivering good education to his students and was willing to tailor things as needed. Personally I don't think he could have done anything better than he already did!
- the content is rather a lot and the two days were a bit squeezed. it would be nice to have more days and also to cover more details in maybe a round two of the seminar.

### Comments on the extent of the workshop

- The workshop could be longer to cover more topics.
- Maybe further course
- For a 2 day introduction, it was appropriate but it would be nice if there was a longer or second workshop with more advanced methods.
- should be longer, to cover more arguments
- The two days were too little to cover the content and therefore a version two of the training is highly recommended.

*The exact wording (including abbreviations, punctuation, etc.) has been adopted.*

### Online Format:

■ strongly agree 
 ■ agree 
 ■ neither agree nor disagree 
 ■ disagree 
 ■ strongly disagree

*Please note: One person did not answer the fifth Question.*
