
Course Assessment Data Science in the Natural Sciences with R (Part1)
03.03.25 - 07.03.25 (9:00 -13:00)

Ergebnisse

Umfrage 955111

Anzahl der Datensätze in dieser Abfrage:	18
Gesamtzahl der Datensätze dieser Umfrage:	18
Anteil in Prozent:	100.00%

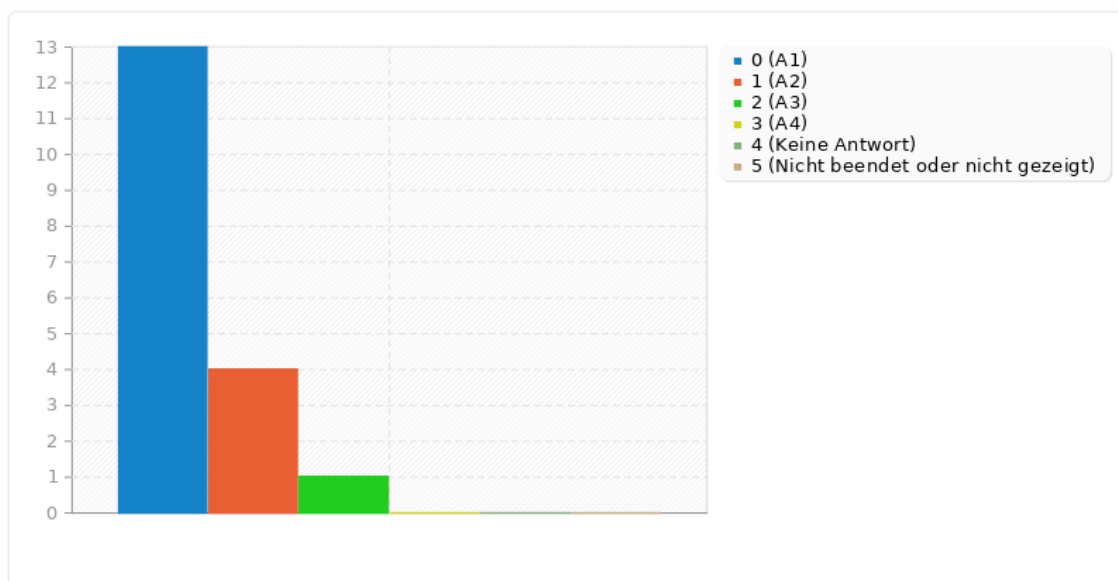

Zusammenfassung für Q00

Overall, how were the expectations you set for the course met?

Antwort	Anzahl	Prozent
Very good (A1)	13	72.22%
good (A2)	4	22.22%
less good (A3)	1	5.56%
were hardly fulfilled (A4)	0	0.00%
Keine Antwort	0	0.00%
Nicht beendet oder nicht gezeigt	0	0.00%

Zusammenfassung für Q00

Overall, how were the expectations you set for the course met?

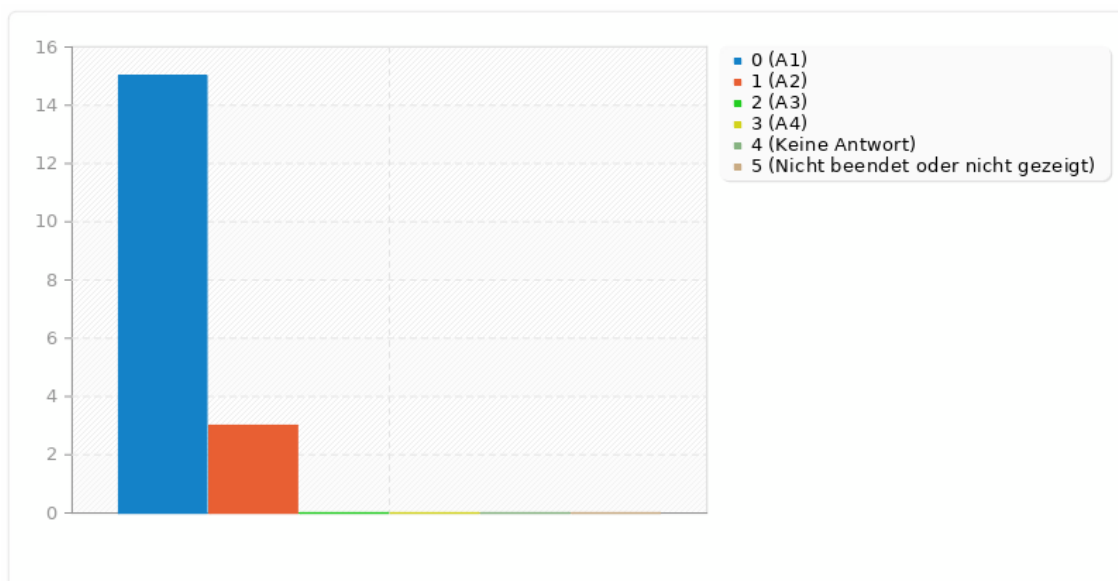

Zusammenfassung für didaktik

How do you assess the didactic design (topics, choice of materials, examples)?

Antwort	Anzahl	Prozent
Very good (A1)	15	83.33%
good (A2)	3	16.67%
less good (A3)	0	0.00%
were hardly fulfilled (A4)	0	0.00%
Keine Antwort	0	0.00%
Nicht beendet oder nicht gezeigt	0	0.00%

Zusammenfassung für didaktik

How do you assess the didactic design (topics, choice of materials, examples)?

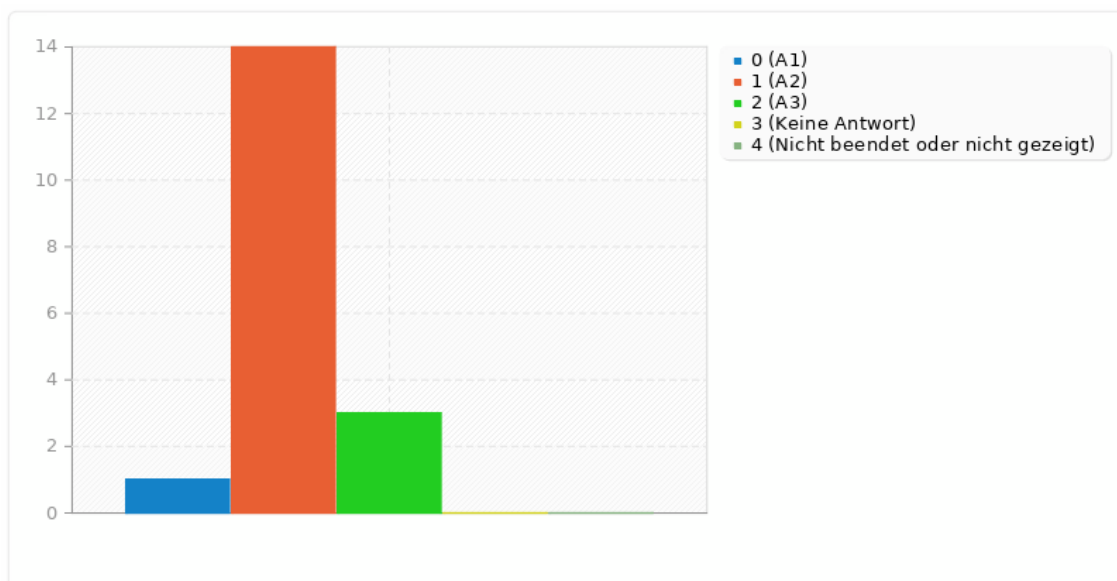

Zusammenfassung für niveau

What was the level of the course like for you?

Antwort	Anzahl	Prozent
was too high for me (A1)	1	5.56%
was just right for me on average (A2)	14	77.78%
was too low for me (A3)	3	16.67%
Keine Antwort	0	0.00%
Nicht beendet oder nicht gezeigt	0	0.00%

Zusammenfassung für niveau

What was the level of the course like for you?

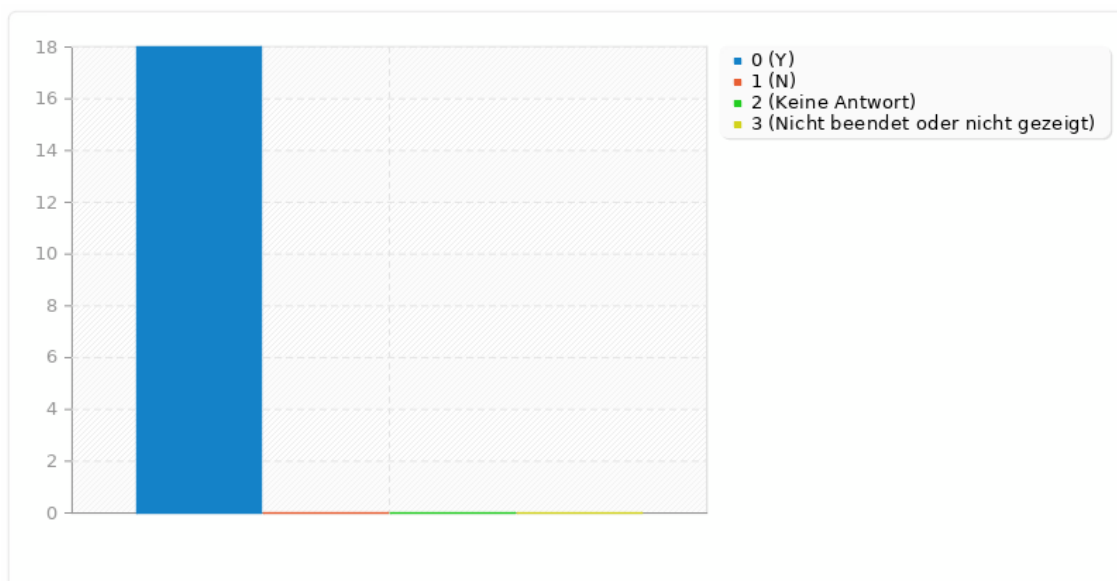

Zusammenfassung für Diskussion

Was there enough time for discussions?

Antwort	Anzahl	Prozent
Ja (Y)	18	100.00%
Nein (N)	0	0.00%
Keine Antwort	0	0.00%
Nicht beendet oder nicht gezeigt	0	0.00%

Zusammenfassung für Diskussion

Was there enough time for discussions?

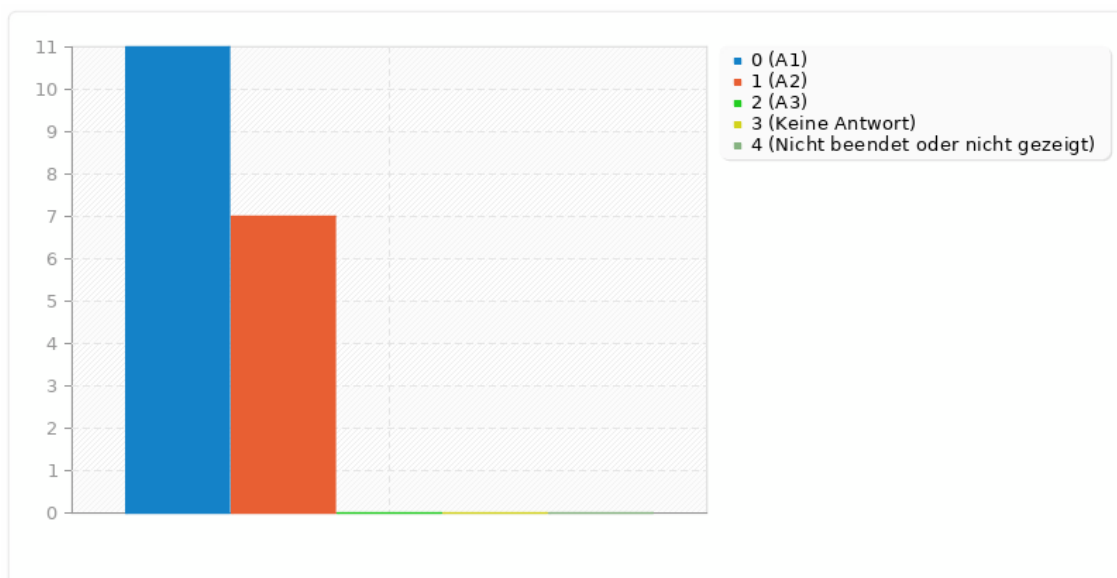

Zusammenfassung für praxis

How were the practical exercises on the PC for you?

Antwort	Anzahl	Prozent
sehr gut (A1)	11	61.11%
gut (A2)	7	38.89%
weniger gut (A3)	0	0.00%
Keine Antwort	0	0.00%
Nicht beendet oder nicht gezeigt	0	0.00%

Zusammenfassung für praxis

How were the practical exercises on the PC for you?

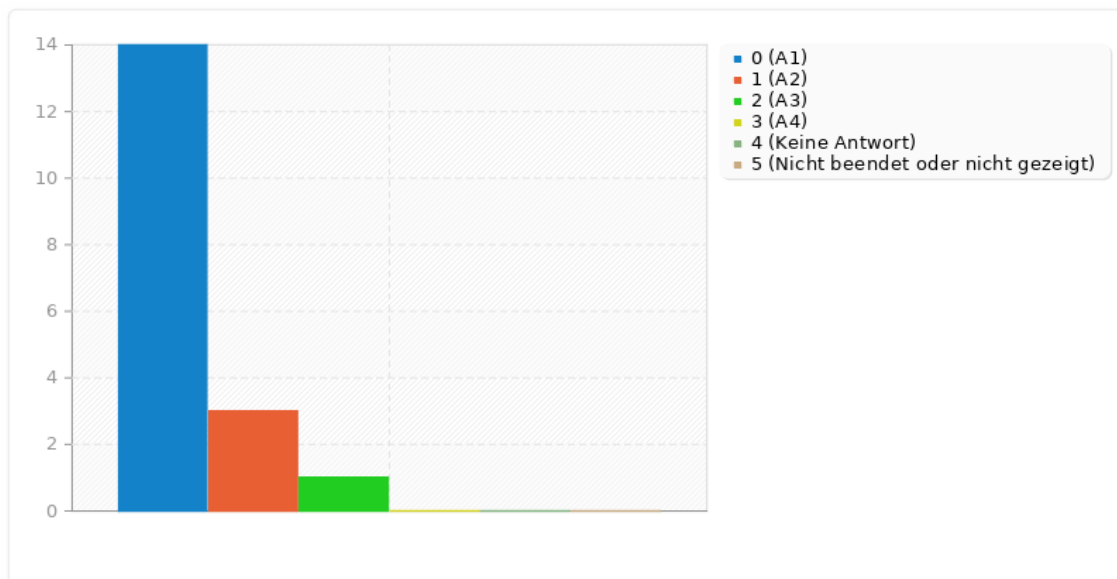

Zusammenfassung für skript

Rate the script especially from the point of view of later reference!

Antwort	Anzahl	Prozent
sehr gut (A1)	14	77.78%
gut (A2)	3	16.67%
hinreichend (A3)	1	5.56%
eher nicht (A4)	0	0.00%
Keine Antwort	0	0.00%
Nicht beendet oder nicht gezeigt	0	0.00%

Zusammenfassung für skript

Rate the script especially from the point of view of later reference!

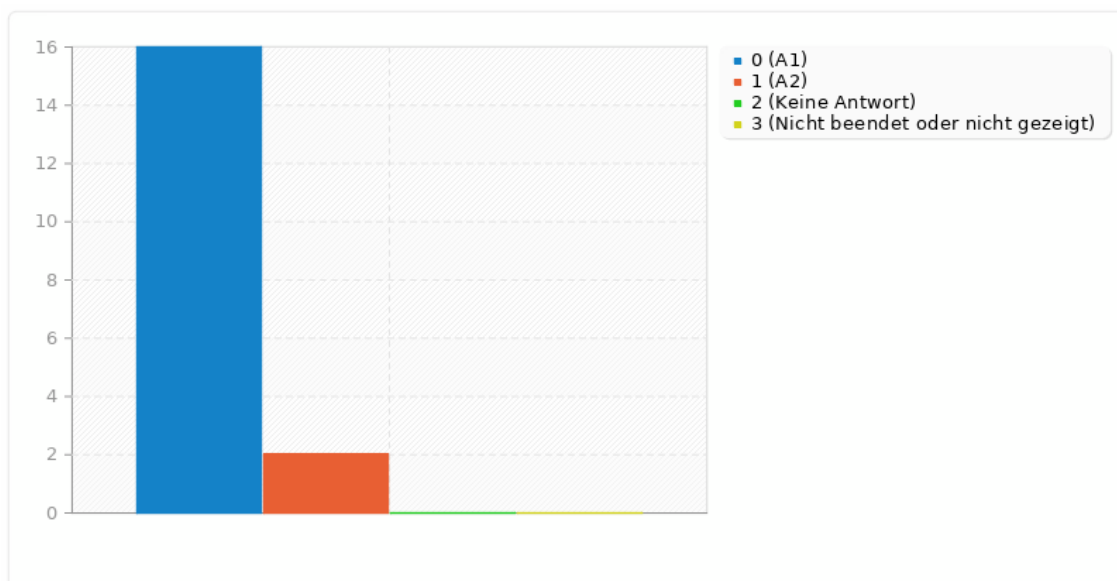

Zusammenfassung für statistik

Did you have enough statistical knowledge to participate in the course without difficulty?

Antwort	Anzahl	Prozent
ja (A1)	16	88.89%
nein (A2)	2	11.11%
Keine Antwort	0	0.00%
Nicht beendet oder nicht gezeigt	0	0.00%

Zusammenfassung für statistik

Did you have enough statistical knowledge to participate in the course without difficulty?

Zusammenfassung für motivation

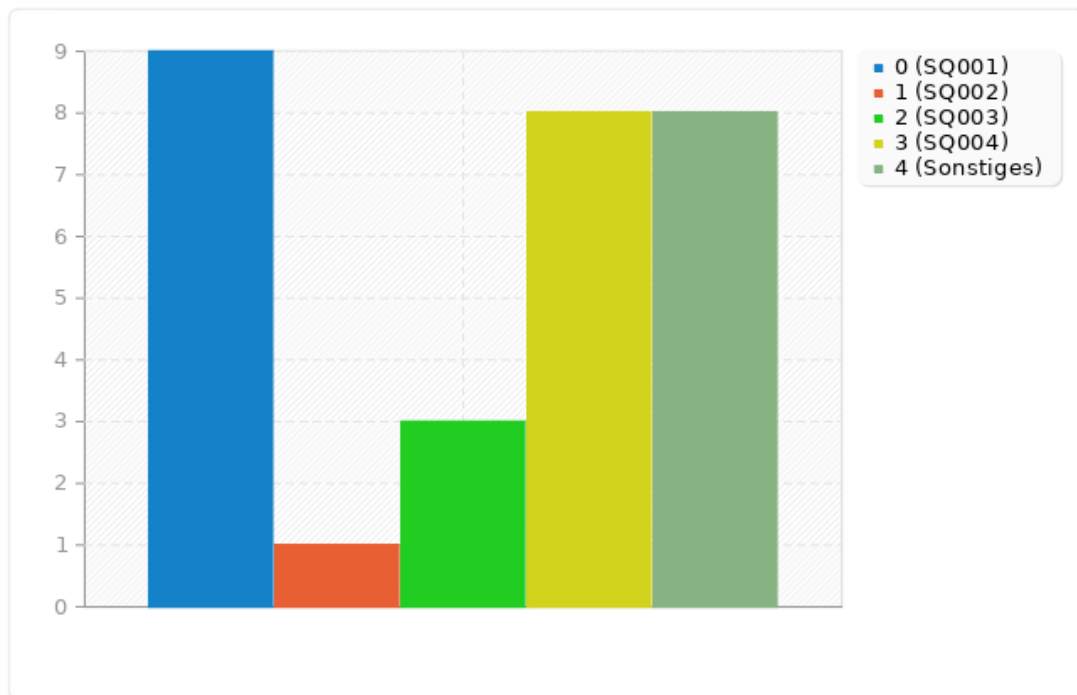

What was your motivation to participate in the course (multiple answers possible):

Antwort	Anzahl	Prozent
Dringende Arbeit mit R stehen für mich an (SQ001)	9	50.00%
Ich wurde gedrängt, teilzunehmen (SQ002)	1	5.56%
Ich habe den Kurs als Schnupperkurs betrachtet, brauche ihn aber nicht unbedingt (SQ003)	3	16.67%
Endlich mal ein Kurs zu diesem Thema! (SQ004)	8	44.44%
Sonstiges	8	44.44%

ID	Antwort
2	I want to learn R
4	curiosity
5	I often have grad students here with R questions and always love to expand personal knowledge
7	Our project team members use R, instead of Python which I am familiar with, therefore for consistency I needed to learn R.
12	Mr.Schmidt's clear and easy explanations
13	study about statistics
15	getting an update on new R packages, tricks and shortcuts, advice on doing nice graphics/how to best visualize data, best practices for writing code in R
18	learning new skills

2	I like the overall idea of the course. I am a beginner on R with no previous experience on R and coding. This workshop gave me the first idea on how could I work on R and its application.
3	We can ask questions and solve them by sharing our screen with the lecturer. It allows us to address the issues on time
4	Everything was well explained. There was a lot of time spent on explanations. Every material was shared. Good use of zoom and other features (painting, remote access, etc.)
5	Paul managed to expand my knowledge even as an old-school R user. From my personal anticipation the different parts of the workshop were well chosen and building on each other. In summary I would say best R-course I have been to and definitely better structured than my own.
6	Description and breakdown of details in R codes
7	I like how the session is open to all levels of question (beginner to advanced) and patience of the instructor to respond to those.
8	The pace of the exercises and explanation, the reliability of the examples are the highlight
9	I liked the boxplot that shows points, box, and the distribution of the data, and I also liked the ANOVA analysis along with the Tukey test and the resulting detailed table.
11	Das Tempo in dem Du den Kurs durchgeführt hast war sehr gut und deine Erklärungen sehr verständnisvoll! Danke, dass du dir für jede*n einzelne*n so viel Zeit genommen hast.
12	Every part was quite clear enough to understand and especially the examples were covers all kind of possible studies very well. Also Mr.Schmidt's R web site is perfect for both self-studying and interactive studying. Thanks to him for creating such useful and free source
14	I liked a lot that Mr Smith answered our questions with patient and the answers were very clear.
15	the material and resources; teacher's clarity, availability; teacher's tips on useful packages and functions
16	Many practical examples, tips for R or statistics in general, that not everyone knows about it, the pace of the course.
17	Very helpful, very clear explanations, immediate answers, committed presenter, good inclusion of all knowledge levels, clear and easy to follow examples
18	I had to get out of my comfort zone and realized that understanding how programming works is not that hard and computers don't bite :) It was really useful for people of all levels of knowledge and Paul designed and delivered the course in a way that would encourage everyone.

4	For me personally the progress was very slow, but that is a subjective view and I would still participate as there were helpful and useful hints.
5	That it ends now ;-)
6	None
7	Not much really.
9	Nothing.
12	Literally nothing! Everything was established in a very efficient way!
13	taking too much time solving troubleshoots
14	Actually I like all the course!!!
15	I would have liked to delve into "Professional creation of various graphs; packages: {ggplot2}, {desplot}" but perhaps it will be done in part2. Overall the course was very useful and well-structured.
16	Examples sometimes got a little to complex. Could stick to basic example in order not to confuse or demotivate others.

4	Maybe a detailed description of the experience levels of participants would help to see if it would be alright to start with Part 2 instead of Part 1.
5	maybe an spin out on graphical r use like esquisse
6	None
7	With the development in AI and inevitable use of it by the trainees, it could be helpful to integrate how to use AI tools (e.g chatgpt, claude) to maximize the R use experience.
9	It will be good to also think of a training on GIS and remote sensing.
11	No, thanks. Everything was fine
12	For topic selection was just right for my studies. And dividing the course into 2 part is perfect decision. For the future I recommend the same. Only the time between part1 and part2 could be little longer like 2-3 weeks only, not more.
14	No, sorry
18	No, not at the moment. For me it was really good organized.
