

## Evaluation of the workshop “Statistics with R - An Introduction”

Lecturer: Dr. Paul Schmidt

Attendance: 15 (12 filled out the evaluation)

Date: December 3 and 4, 2025

*The total may deviate from 100% due to rounding.*

### What did you especially like?

- Well structured workshop. The shared manuscript was especially helpful.
- The instructor and the structure of the workshop. Thank you very much for offering it from the Graduate Centre!
- Receive lots of useful content and tips for the own work
- New Knowledge
- The course content was very well-designed. There was a gradual learning curve from introducing a topic to it's application to real data. There were sufficient exercises to get more supervised hands-on experience and get comfortable with coding in R.

### What do you think could be improved?

- The only part where I got a bit lost was the Import/Export chapter. I was so much occupied with installing and loading packages and data files that it was hard to follow.
- This workshop must be followed up by advanced methods
- Should be held in person
- The course and the resources shared were excellent and I would like to attend more advanced workshops on usage of R in statistics from Paul.
- Perhaps longer workshops (5-day long) to cover more advanced topics in using R for statistics, for instance advanced usage of ggplot2 to plot volcano plots, heat maps, PCA plots on more complex Omics data for instance. Other important topics of statistics like

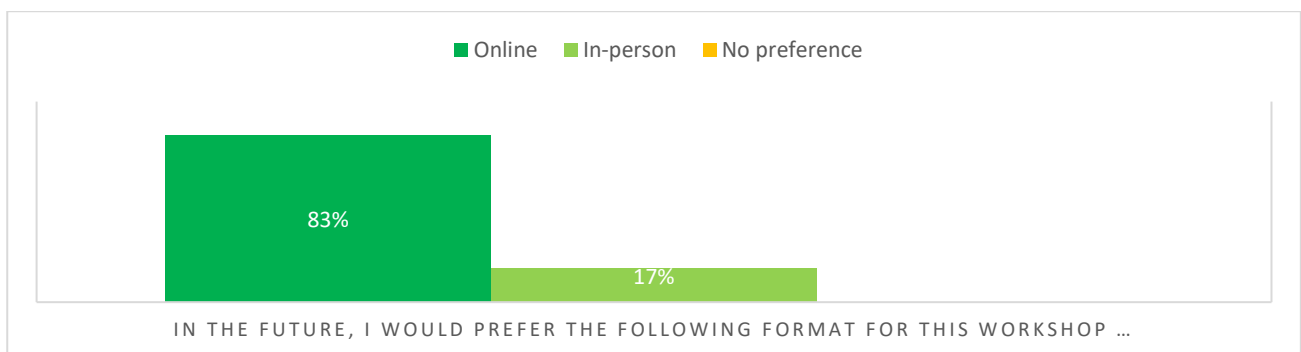

p-value adjustment, data normalization, dealing with outliers, missing values, etc. be covered in more details.

### Comments on the extent of the workshop

- It was a really helpful and great workshop. I would love an advanced course from this instructor.
- This workshop was one of the best I have ever attended. The balance between practice and theory was just right, and I learned a lot about R and statistics in general.
