

Evaluation of the workshop “Statistics with R - an Introduction”

Lecturer: Dr. Paul Schmidt

Attendance: 14 (14 filled out the evaluation)

Date: December 4 and 5, 2024

The total may deviate from 100% due to rounding.

What did you especially like?

- Everything.
- The exercises inbetween learning. The lecturer was very good at explaining and solving possible issues.
- I had no experience at all but it was very easy for me to understand and follow. The speed of the lecturer was perfect.
- That he explained everything in a very beginner friendly, super easy way, that he was calm, collected friendly and tried to convey very abstract topics in a concrete and user-friendly way.
- Step-by-step, exercises, slow-paced
- Quite organized
- good structure of each session and the coach can deliver information with very simple and clear language.
- the handout in github

What do you think could be improved?

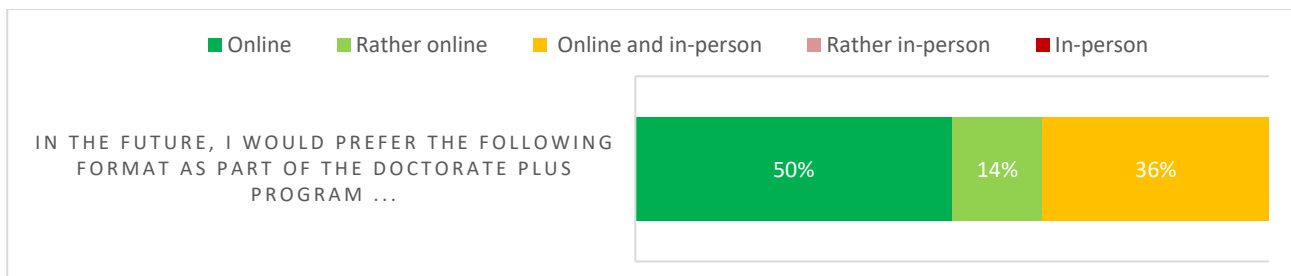

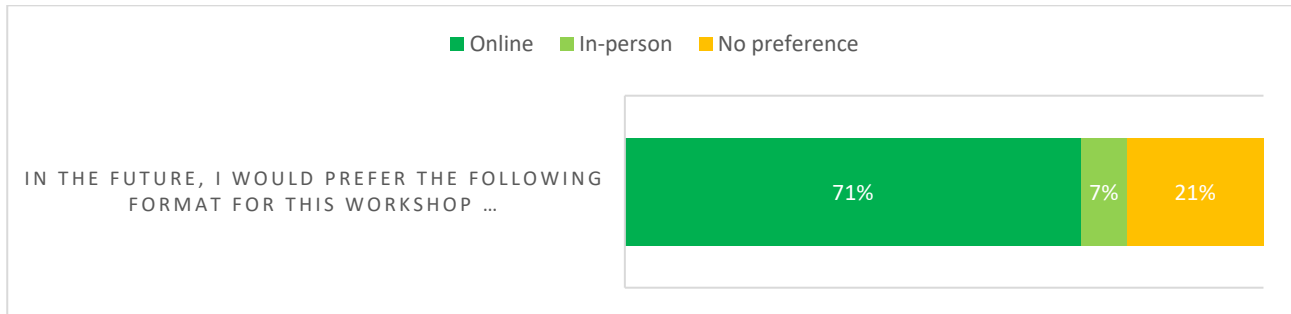

- Time was not enough. It should be longer.
- More time to fit in more exercises to deepen the first learned things.
- Theoretical logical concepts behind programming and computers. (But not his fault: only two days!)
- Focus the course on the appliance of statistic tests in R instead of the basics of statistics; matching the statistic instructions to the knowledge of the course. E.g., ask the course if everyone knows what correlations are before explaining it in detail. If everyone knows what correlations are, this chapter can be skipped in favor of other more R-related topics.
- not really
- The tempo was rather slow in some chapters. It could be improved by asking the course how much they already know, e.g., about statistics.
- could have more advanced session
- it should be at least three days

Comments on the extent of the workshop

- I want to have more time
- Could be def longer to gain more insights
- Could be one day longer, it was very nice
- The presenter did everything in a great way and did his best. But the graduate center should give him at least a week to cover all the base topics. Two days is not enough!
- Need more time for more. R is a big world
- It could be even longer to get more insights on R. It seems like there are even more basics in R that need to be learned.
- could be more

The exact wording (including abbreviations, punctuation, etc.) has been adopted.

THE WORKSHOP WAS CLEARLY AND CONCLUSIVELY STRUCTURED.

86%

14%

THE CONTENT WAS CONVEYED IN AN INTERESTING AND COMPREHENSIVE MANNER.

79%

21%

THE THEORETICAL AND PRACTICAL PARTS WERE WELL BALANCED.

64%

29%

7%

I LEARNED NEW TECHNIQUES/METHODS AND GAINED NEW INSIGHTS WHICH I WILL BE ABLE TO APPLY IN THE FUTURE.

86%

14%

THE EXTENT OF THE WORKSHOP PROGRAM WAS APPROPRIATE.

43%
